MESSAGE FROM THE PRINCIPAL

Dear Parents,

The students have spent two months acquiring a wealth of knowledge. They are familiar with our teachers and they have experienced new interesting learning methods. They made a lot of effort to acquire new knowledge and achieve good results through tests and practice in class.

In addition to the cultural knowledge learned at school, Students of SVIS have had the opportunities to participate in unique activities such as: the green environment day to clean up Nha Trang Beach and Mini-league football games after school. The children were encouraged to be as creative as possible, to express their enthusiasm with unique and funny ideas in a simple, beautiful and eye-catching handmade lanterns to welcome the Mid-Autumn Festival.

Through these activities, it is found that the students unite in love, have a strong attachment together, express their humanity in the way they learn.

We wish you good health, happiness and success.

The Principal

Mrs. Nguyen Thi Hanh

COMMENTS FROM THE TEACHER OF GRADE 01 - PHONICS CLASS

The first grade is the first class in the lives of students when they officially set foot in a place called School. And letter learning is also a very important learning skill for the children. Every day, they have a phonics Class, which means that each day they will acquire onenew syllable/ vietnamese phonic.

Phonics Class is an exciting and interesting lessons for the children. At first, the children will be introduced to a new sound / syllable. The teacher will instruct them to read correctly then they have to match the sound / syllable into the table. Phonics Class is not boring because in addition to make contact and visualize the letters, the children will be able to see many real and vivid images related to those sounds/ syllables. The children will have to solve puzzles and play witty and useful learning games. These will help the children to feel some extent of the national language's values. Furthermore, this class serves another purpose. In order to fully embrace the phonics class, the children have to work on their handwriting. Writing beautifully let the children appreciate their hard-work.

Teaching the first grade students to read correctly and to write well is central and it is a leading mission for our teachers. In order to do this, it is necessary for the children to make some effort and it is vital for the parents to support their children at home.. I am confident that we will accomplish this noble mission if we all work together for the common objective.

We wish you all good luck and success .

Ms. Duong Thi Thu Hanh - Primary Teacher

MID-AUTUMN FESTIVAL

Mid-Autumn Festival is an occasion for Vietnamese children to participate in many different activities.

On the 24th of September, the school made an impressive starlight lantern with a height of 3 meters. We also prepared exciting activities such as: Lion dance, paintings contest, fruit tray decoration, photo contest.

The school's young professional team of lion dance roused the Mid-Autumn Festival's atmosphere with playful and witty performances. Students of Grade 1, 2, 3 were delighted to show their ingenuity through paintings. From grade 4 to grade 11, each class showed the skillful competence in cutting fruit into lovely and colorful animals. Their imagination were high through the contest of fruit tray decoration.

The annual Mid-Autumn Festival gives our students the spirit of solidarity, creativity and special exchanges between classes.

Mr. Nguyen Trung Tinh - Physics Teacher

DO EXERCISE - FOOTBALL CLUB

We often think that doing exercise is simply to relax and stay healthy, however, the reality shows that doing exercise has other benefits. Physical education contributes to the student personality formation. Health and wisdom are the most precious assets of every person. Having good health will help the mind to be developed better and vice versa. Doing exercise helps students achieve good health, so that they learn well and participate in school activities with higher efficiency.

Football clubs are held every Monday and Friday. The students have participated enthusiastically and happily. It is also a playground for children to show their talent and passion. There are also basketball and martial arts clubs which are two clubs that students are delighted to join in. Besides the playground at school, it is expected that a friendly football match with another school will be held in October to help children gain experience and exchange with other children. It is a good motivation for the children. Health is very important to us. Let's exercise! You will feel a change every day; You will have good health, a relaxing mind. When you have good health and mind, you will do anything you want.

Ms. Pham Nguyen Le Trinh - PE Teacher

HANDMADE CLUB

Every Friday afternoon, the students gathered in grade three's classroom to make some handmade products

The looks at the naive eyes with the familiar questions: "What are we doing today, teacher?" How lovely they are!

From the simple, easy-to-find items, students can make cute gifts for themselves or their relatives like: Rainbow paper candy floss, wrap cap, a branch of rose, nut keychain, wool pictures, greeting card, origami flower... After school, their hands are dirty with colors, glue... but they are excited to see their own funny handmade products. Hope that all the students will have more passion, skills and respect for what they have from this small club.

Ms. Nguyen Thi Hanh Vi - Primary teacher

SMALL PROJECT OF THE YEAR 8 STUDENTS - ADVENTURE SPORTS

Most English learners know the names of common sports in English, like football, basketball and tennis. However, grade 8 at SVIS has been focusing on more unusual sports including "extreme" or "adventure" sports, with exciting results.

Working in groups, topics chosen by the students include parkour (climbing and running along high buildings), wing flying and cave diving, inspired by the recent rescue of 12 young soccer players in Thailand. The students have produced excellent powerpoint presentations in the computer lab and received tips on giving presentations, including the design of the slides, organizing a presentation, posture and gesture. At the same time, students are learning the skills of teamwork, meeting a deadline and speaking to an audience.

This will be one of many interesting topics covered in grade 8 this year. In the next project, students will be asked to design urban solutions for our beautiful coastal city of Nha Trang. We can't wait to hear their ideas!

Mr. Jonathon Charles Marquis - English Teacher
